

Evidence-based Practice Presentation Evaluation

Students:

Topic:

Section	Possible	Points
A. Clinical Question - focused clinical qn in PICO format - about a specific intervention or intervention feature - about a specific population and outcome - linked to an imaginary clinical case	10	
B. Background Information - P I C O - brief but informative, relevant, accurate, clear - relevant to clinical qn and scenario - sources clearly attributed	10	
C. Study 1 - purpose/qn - design & method - findings & conclusion - link to clinical qn - quality of study & level of evidence	10	
D. Study 2 - purpose/qn - design & method - findings & conclusion - link to clinical qn - quality of study & level of evidence	10	
E. Study 3 - purpose/qn - design & method - findings & conclusion - link to clinical qn - quality of study & level of evidence	10	
F. E³BP Answer to Clinical Qn - findings from micro-body of 3 research studies - logically & critically analyzed and integrated - fit with background info - fit with clinical judgment of value for the case - fit with case client priorities & preferences - outcome data to test the EBP decision	10	
G. References - complete reference list - citations and list match - mainly APA format	5	
H. Presentation Quality - volume, intonation, pacing, & gaze - formal, objective, precise language - slides visually unified across three presenters - slides in abbreviated sentences or phrases with adequate detail - slides clear and readable from back of room - printed multi-slide/pg handout clear & easily readable	10	
I. Overall Quality - 15-20 minute complete presentation with handout - knowledge, preparation, and practice evident for all presenters - critical, accurate evaluation & E ³ BP judgment - claims and judgments match evidence and inform clinical scenario	10	
Total Points	85
